

# The Year in **Infrastructure** 2011

The Extraordinary Infrastructure Projects of the 2011 *Be Inspired Awards*

Ekofarma S.R.L.  
**Design and Manufacturing of the International Pharmacy**  
Urbino, Italy

A leading company in the field of customized furniture for chemists, Ekofarma developed a system for managing the entire design and production cycle for complex furnishings. Connecting the design phase to production allows Ekofarma to automate the generation of data sheets and DXF files for machinery, and manage materials orders.

Ekofarma applied this advanced system to turnkey delivery of the \$1 billion Pharmacy International project in Naples, Italy. Using MicroStation and specialized software (Progenio) developed by a Bentley channel partner, Ekofarma reduced design time and significantly reduced the margin for error. It also enables the company to immediately respond to the market demands to increase competitiveness.
